TECHNICAL SKILLS

Languages	Java, Python, MATLAB, Pl/Sql, Shell(Bash)
Backend & Databases	REST, Apache Tomcat, Nginx, Redis Queue, Docker, MySQL, MongoDB, Oracle
Tools & Frameworks	Django, Flask , Android, D3.js, Apache Spark, Hadoop, Git, Gradle, IntelliJ, AWS, Google App Engine
Machine Learning	Regression, Feature Selection, Reinforcement Learning, Naive Bayes, SVM

EXPERIENCE & PROJECTS

Starbucks Technology Center, Scottsdale, Arizona   🗓 May 2018 - Present
Business Intelligence/ Data Science Intern *(Flask, Python, Sklearn, Nginx, Redis Queue, Alexa, Spacy)*
• Worked on development of Chat bot which can work as a personal Barista for customers. Developed Intent recognition and Entity recognition models for text inputs.Working on integration of chat bot with Alexa.

Tomnet Center, ASU, Tempe, Arizona   🗓 Aug 2017 - January 2018
Research Assistant *(Django, Python, AWS, Nginx, Redis Queue)*
• Developed Webapp for PopGen software, using AWS Implemented Full fledged REST API, and Cache ,and improving the efficiency of underline algorithm to decrease the running time of the software using CUDA.
• Implemented scalability, load balancing of both Webapp and backend using Distributed Queue and Docker.

ASU-Mayo Clinic Informatics Laboratory   🗓 May 2017 - July 2017
Machine Learning Developer(Volunteer) *(Python, Sklearn, Matplotlib, Pandas, Numpy, Machine Learning)*
• Developed Feature Selection tool for Clinical Practitioners to identify relevant features for high dimension data.
• Designed and implemented in-house Pipeline Algorithm for Feature Selection to improve accuracy using Sequential Forward Selection, Lasso, Elastic Net, Mutual Information and Entropy.

Deloitte Consulting, Gurgaon, India   🗓 Jun 2015 - Dec 2016
Technology Consultant *(Data Warehouse, ETL, PL/SQL)*
• Designed and implemented end to end Data Warehouse systems using ETL Tools, shell scripting and performance tuning the database. This solution highly improved data quality, error handling and reduced manual intervention.
• Led Data Warehouse Framework, Architecture Design of the solution that included data profiling and quality.

Accenture, Bangalore, India   🗓 July 2011 - Jun 2015
Software Engineering Analyst *(ERP, Business Intelligence, Mainframe, PL/SQL)*
• Developed and implemented SOA Mainframe application, improved ERP and Business Intelligence reporting solutions.
• Implemented automation in Data warehouse using SAP Data Services, HANA, increased efficiency, speed of the solution.

ACADEMIC PROJECTS

Cloud Pi   REST,Amazon Web Services, IaaS, AWS Java API, C
• Built an elastic, scalable SAAS service application using Amazon IAAS to calculate the value of 'Pi' using SFFT C program.
• Used Java API to create AWS EC2 instance for Application and Web tier, S3 buckets to store large data-set, EBS Snapshots to create EC2 on demand and Simple Queue Service (queue) for handling multiple requests simultaneously.

Hot Spot Analysis of New York Taxi Trip Spatio-Temporal Data   Apache Spark, Hadoop, Scala, HDFS
• Developed a distributed application using Spark scala APIs and Hadoop File System that performs geospatial operations on 300 million data points and returns 50 most statistically signicant Hot Spots in New York area.
• Optimized the application to return the results of processing on such a large number in 4 minutes

Free-Cast   Android Studio, Google Cloud Services, Google App Engine Java API, Firebase
• Created an android app which helped the user to send push notifications to other users which included details of an event like location, freebie type, availability etc. with minimal input from user. It uses Google cloud messaging for now but can be easily migrated to Firebase.

Other Projects
• Electronic Health Record using Alexa (AWS Lambda, Python, Hack Arizona - MLH 2017 season) • Cross Site Scripting XSS filter • Reflector program Redirect Ethernet/IP layer based attack on a host towards attacker using simple but efficient networking techniques.

EDUCATION

Master of Computer Science   🗓 Jan 2017 - Aug 2018(Early Graduate) or Dec 2018
Arizona State University, Tempe, Arizona, *GPA:* **3.56/4.0**
Bachelor of Technology, Computer Science & Engineering   🗓 Jul 2007 - Jun 2011
Jaypee University Of Engineering & Technology, Guna, India, *GPA: 6.2/10*
